

Developing and Implementing a Trauma- and Violence- Informed Approach in Digital Media Literacy Education

**Digital
Smarts**

INTRODUCTIONS

About MediaSmarts

Digital
Smarts

Overview and Objectives

- Gain an understanding of a trauma- and violence-informed approach to digital media literacy education and program facilitation.
- Consider ways to incorporate a trauma- and violence-informed approach in programs and facilitation practices.
- Identify practical tools in trauma-informed facilitation for before, during, and after program facilitation.

**CONTENT
WARNING**

Moving On:

Digital Empowerment and Literacy Skills for Survivors

- Four-year intervention research project
- Goal: to adapt, deliver, and evaluate digital media literacy resources for survivors of family violence and practitioners in the VAW sector

Moving On:

Digital Empowerment and Literacy Skills for Survivors

- Trauma- and Violence-Informed Approach
- Address Complex Online Harms Through Digital Media Literacy Education
- Collaborative and Sustainable Interventions at Individual, Community, and Systems Levels

Resilience through DigitalSmarts

Facilitation Materials

Facilitation Guide

Handbook on Trauma-Informed Digital Media Literacy

Digital Media Literacy

Involves not just **access** to technology, but also how to **use**, **understand**, and **engage** with it.

Technology-Facilitated Violence And Abuse

A form of abuse or controlling behaviour involving the use of technology to coerce, stalk, surveil, or harass another person

Trauma

An event or circumstance resulting in physical, emotional, and/or life-threatening harm.

Trauma also includes the lasting adverse effects that this event or circumstance has on an individual's physical, mental, emotional, social and spiritual health and well-being

Re-traumatization

The re-activation of trauma symptoms through thoughts, memories, or feelings related to a past trauma experience.

Trauma- and Violence-Informed Approach

- Recognizes widespread impacts, signs, and symptoms of trauma and understands potential paths for recovery; fully integrates knowledge about trauma into policies, procedures, and practices; and seeks to actively resist re-traumatization
—SAMHSA, 2014
- Implementing a trauma- and violence-informed approach is a continuous process and not an outcome
- We welcome comments, suggestions, feedback or promising practices on trauma-informed approaches

Handbook content

- Background information
- Six foundation principles for a trauma-informed approach
- Promising practices in implementing these six principles
- Considerations for remote/virtual facilitation
- Tip sheet

KEY PRINCIPLES

of a trauma and violence-
informed approach

Safety

Participants and facilitators should feel physically, emotionally and psychologically safe

Safety in the workshop design

- Multiple breaks (especially after potentially difficult discussions)
- Inclusive and empowering language
- Statements of fact
- Suggesting signals to indicate when participants need a break

Safety: Promising Practices

For facilitators:

- Try to maintain awareness of your own emotions
- Have two facilitators per workshop to support breaks and instances where one-on-one attention may be needed
- Identify and utilize available resources and supports before, during, or after workshops
- Refer to tip sheet at the end of the handbook

Safety: Promising Practices

For participants:

- Explain key concepts
- Consider the way a physical space is set up
- Look for signs of re-traumatization
- Prepare to potentially implement de-escalation techniques
- Debrief

Trust and Transparency

- built through being honest and clear about processes and operations during workshops
- allows participants to feel in-control and empowered while discussing potentially difficult topics

Trust And Transparency: Promising Practices

- Confirm participants understand the workshop purpose and agenda
- Set expectations and boundaries at the start
- Check in regularly, allow for breaks when needed
- Communicate when you need to adjust the agenda

Peer Support & Collaboration

Key to establishing safety, well-being, and resilience because participants are often more empowered by collective rather than individual efforts

Peer Support & Collaboration: Promising Practices

- Allow space and time for building relationships
- Allow participants to first assess and express their needs
- Collaborate with participants to make decisions where possible

Empowering Participants

Encouraging participants' strengths and honouring their experiences, choices, and contributions

Especially important because of the feelings of powerlessness and lack of control associated with trauma and abuse

Empowering Participants: Promising Practices

- Allow participants to make choices
- Affirm and validate participation
- Ask questions that encourage resiliency

Considering Intersectionality And Cultural Humility

A trauma-informed approach acknowledges, respects, and is responsive to participants' identities and the intersections within those identities

Intersectionality & Cultural Humility In The Workshop Design

This program is shaped by MediaSmarts' work with a diverse network of partners and advisors who serve a diverse group of survivors

Considering Intersectionality & Cultural Humility: Promising Practices

- Maintain awareness of identities, their intersections, and how they may impact participants' trauma and participation
- Be respectful and open to different cultural approaches and ways of knowing
- Avoid assumptions and generalizations of different identities
- Use inclusive language and approaches

Remote Facilitation: Challenges

- Barriers created by not sharing the same physical space (e.g. protecting participants privacy)
- Participants may join from spaces in which they experienced trauma
- Screen fatigue

Remote Facilitation: Promising Practices

- Confirm participants are in a safe and comfortable space
- As much as possible, ensure online privacy and safety
- Make use of online features that can enable safety and well-being
- Consider body language and environment

Tip Sheet: Summary of Promising Practices

Key Definitions:

Digital Media Literacy: the ability to access, use, understand, and engage with media in all forms confidently and critically.

Technology-Facilitated Violence and Abuse: a form of abuse or controlling behaviour involving the use of technology to coerce, stalk, surveil or harass another person.

Trauma-Informed Approaches: understand and are sensitive to the histories of trauma that people carry and encourage environments of well-being and safety rather than practices that may inadvertently re-traumatize.

Recommended Practices

Safety

- Confirm that participants understand key concepts including trauma and abuse.
- Establish access to supports.
- Look for signs of triggers and re-traumatization.
- Review de-escalation techniques.
- Set up the space with safety in mind.
- Allow more time for debriefs if needed.

Trustworthiness and Transparency

- Confirm participants understand the workshop purpose and agenda.
- Set expectations and boundaries.
- Check in regularly, allow for breaks when needed.
- Be honest and transparent including when you don't know something.

Peer Support and Collaboration

- Allow space and time for building relationships.
- Allow participants to first assess and express their needs.
- Collaborate with participants to make decisions where possible.

Empowerment

- Allow participants to make choices.
- Affirm and validate participation.
- Ask questions that encourage resilience such as: "What thoughts or actions give you hope?"

Cultural Humility

- Maintain awareness of identities, their intersections and how they may impact participants' trauma and participation.
- Be respectful and open to different cultural approaches and ways of knowing.
- Avoid assumptions and generalizations of different identities.
- Use inclusive language and approaches.

Remote Facilitation

- Confirm participants are in a safe space and can protect their online safety and privacy.
- Make use of online features such as registration and breakout rooms to promote participant safety.
- Consider how your body language and environment may come across to participants.
- Debrief and send follow-up email with workshop materials, resources, and supports.

RESILIENCE THROUGH DIGITALSMARTS

**Digital
Smarts**

Introductory workshops

- Intended for participants with most limited skills
- Focus on fundamental skills in **Access** and **Use** categories
- Little overlap

Advanced workshops

- Intended for active Internet users
- Cover more advanced **Use** skills and introduce **Understand** and **Engage** skills
- Some overlap with Introductory workshops and each other

Workshop format

Each workshop follows the same structure:

- Overview
- Content topics
- Quizzes
- Hands-On Activities
- Troubleshooting
- Vocabulary review
- Questions
- Follow-up: video and practice sheet

DIGITAL STORYTELLING

During this workshop, you will:

- Learn what a digital story is
- Learn the benefits of digital storytelling
- Explore different approaches to digital storytelling
- Identify what makes a good digital story
- Plan, script and record a digital story
- Think about publishing your story

Digital
Smarts

Four decorative circles are positioned on the left side of the slide. The top-left circle is light blue with a white chevron pattern. The top-right circle is purple with a white pattern of overlapping circles. The middle circle is dark blue with a white pattern of small dots. The bottom-left circle is light red with a white grid pattern.

Thank you for attending!
