# What We Heard: A Snapshot of Perspectives on AI & GBV

Survey Design: Methods and Scope
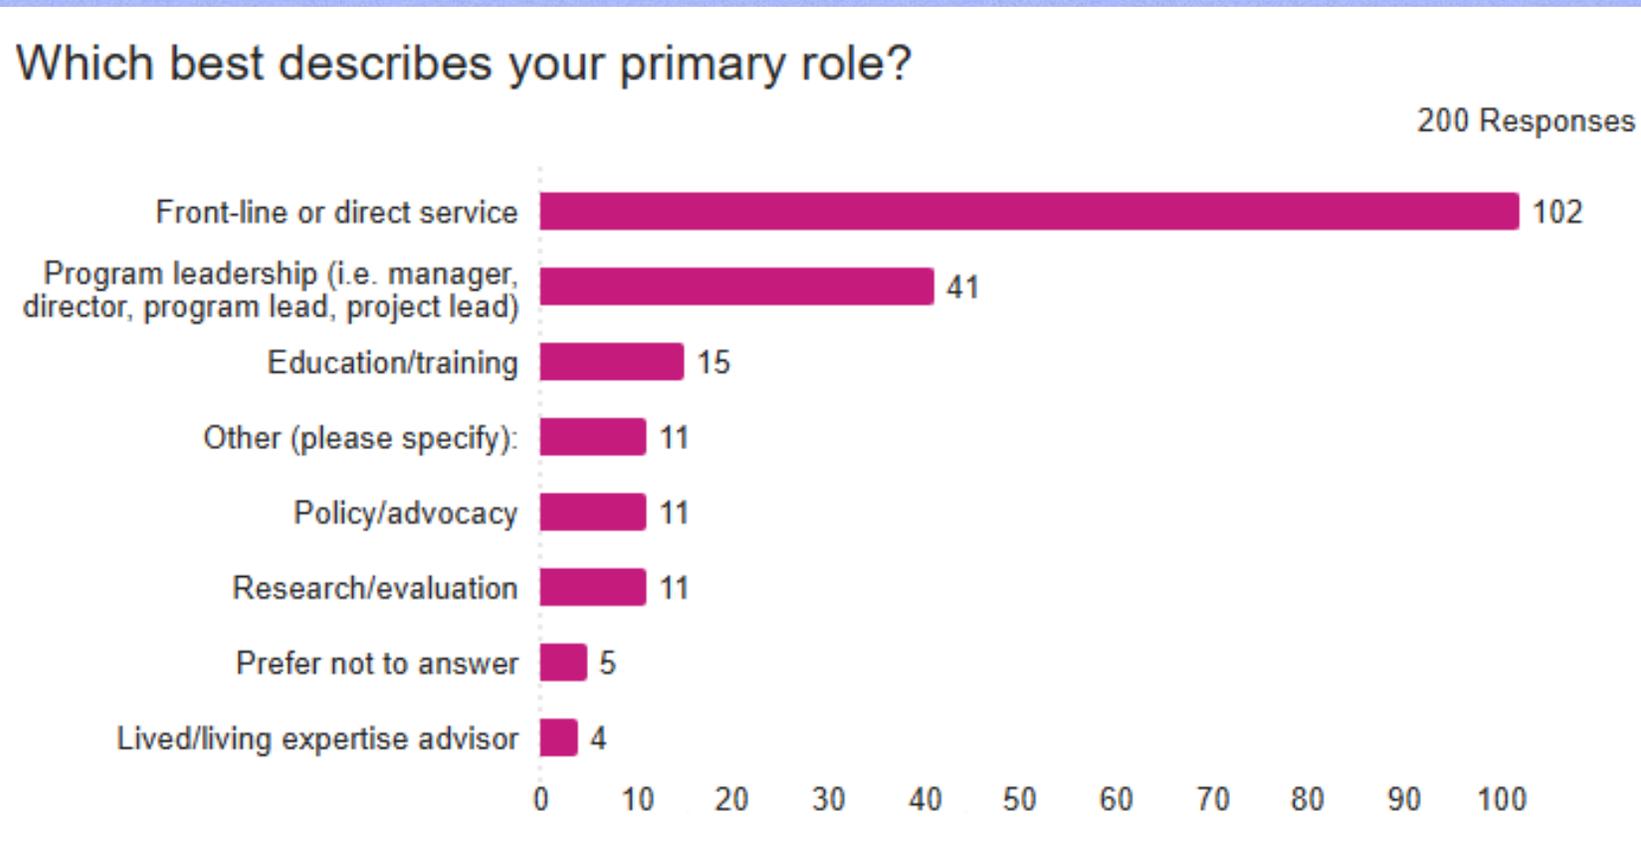

Themes explored within the survey

Where is AI showing up in GBV-related work?

Have you encountered AI-enabled harms in your work?

What risks or concerns feel most relevant when thinking about AI in GBV contexts?

Where do you see potential future uses of AI in GBV-related work (if at all)?
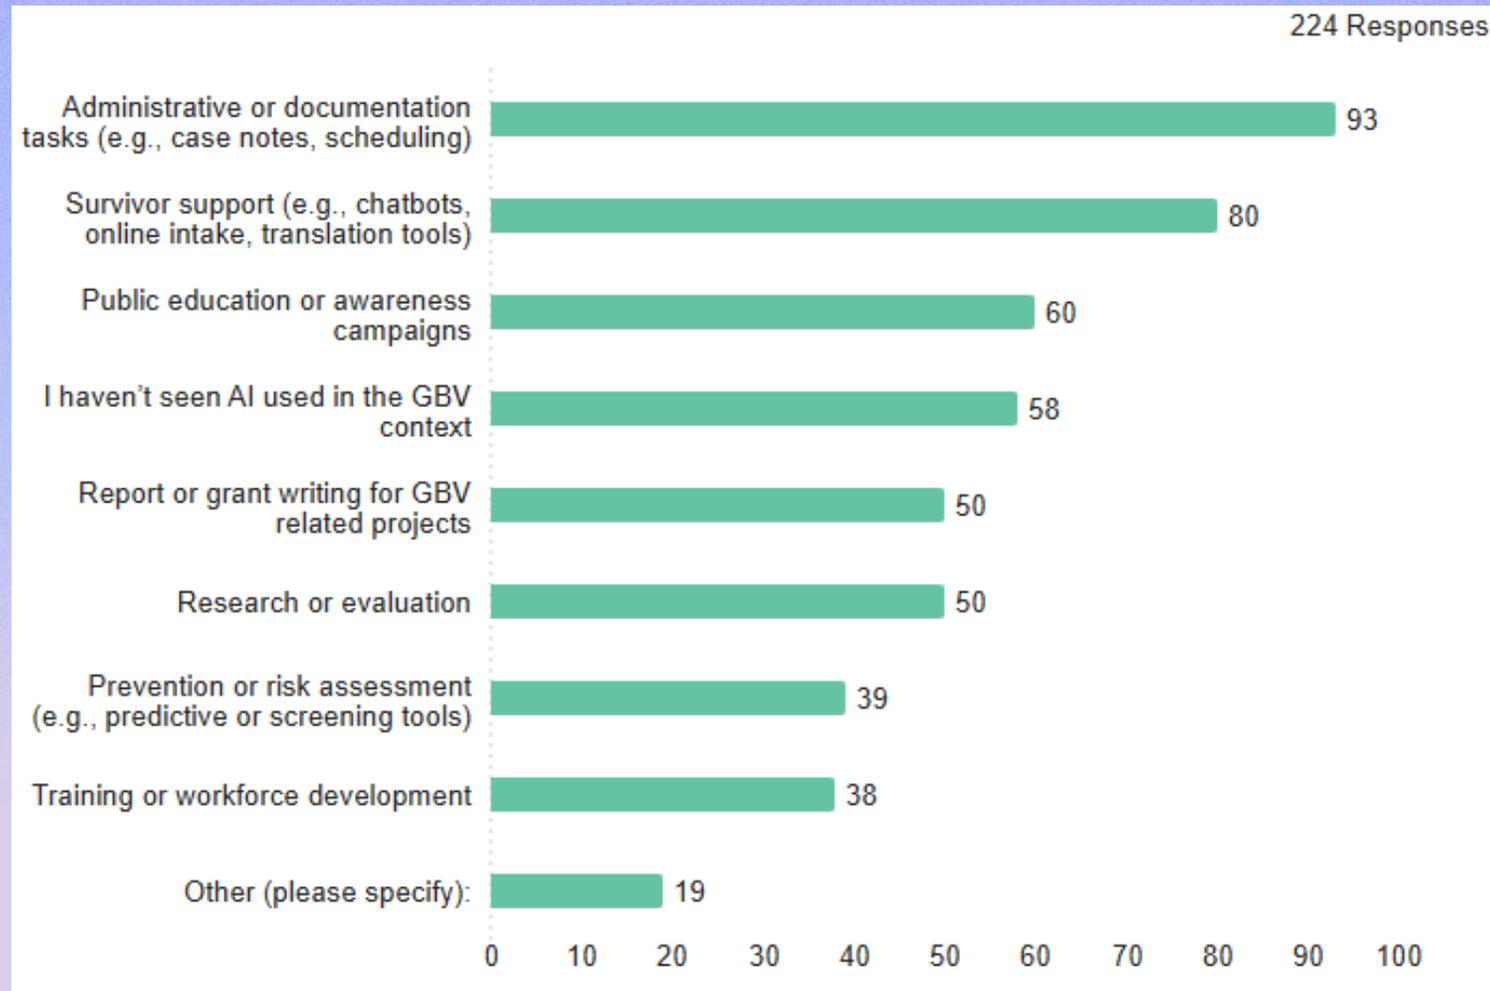

Who Responded to the Survey
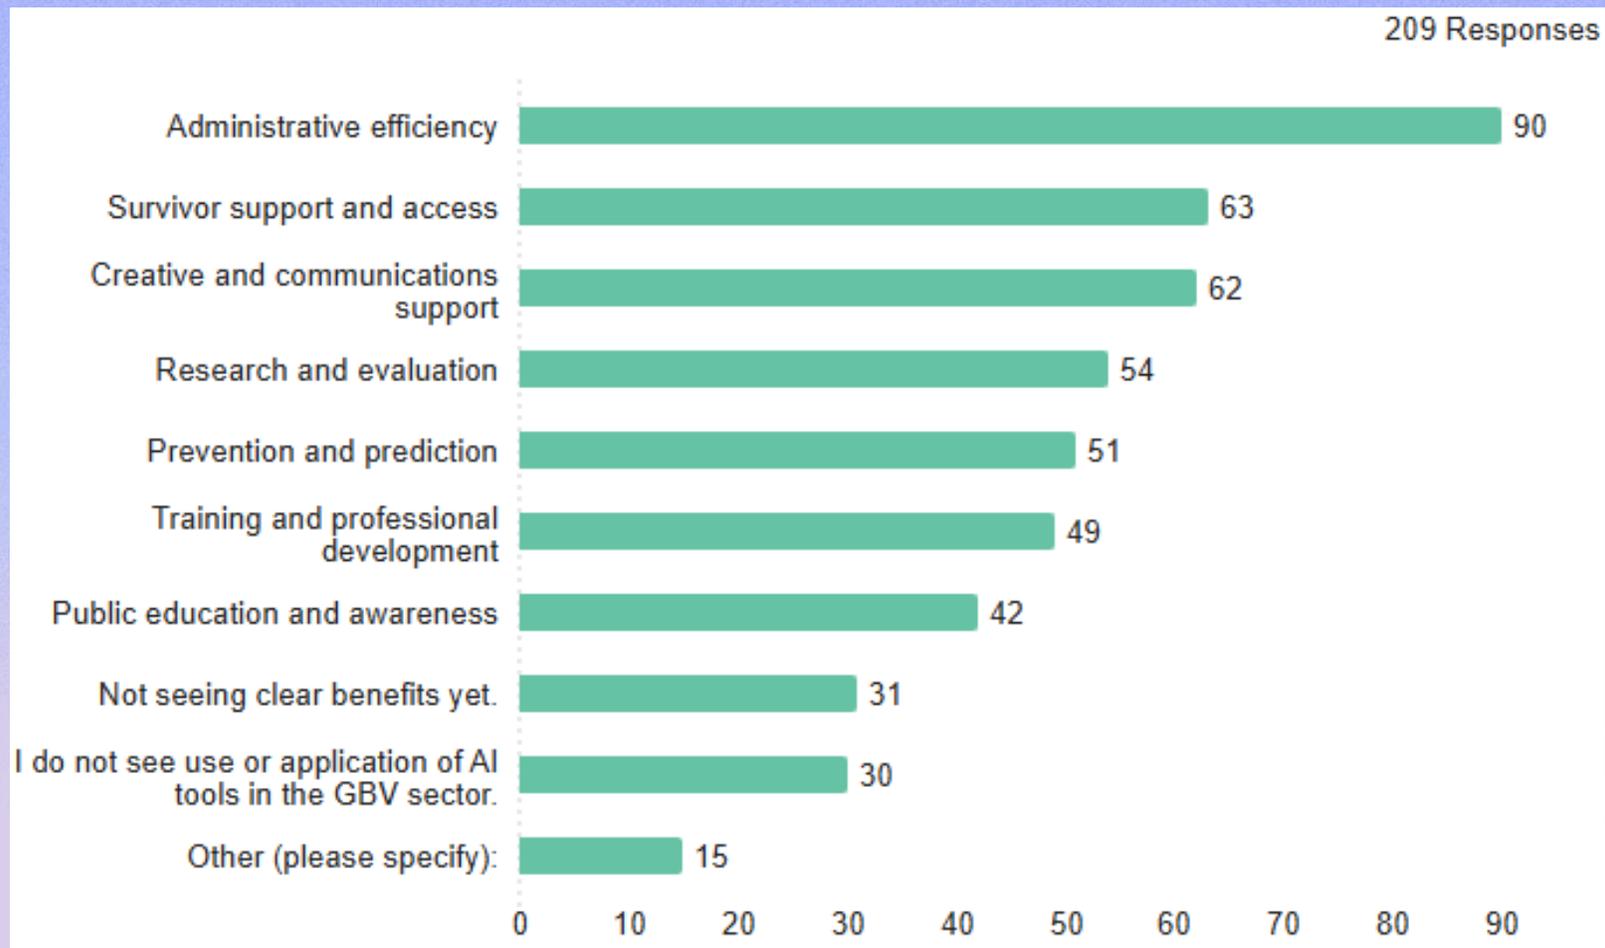

Which best describes your primary role?

How Respondents Are Navigating AI

- AI is already present in GBV-related work and environments
- Engagement is uneven and highly context-dependent
- Decisions about AI are shaped by values, roles and responsibilities
- Safety, privacy, and equity strongly shape decisions about use

Where Respondents Are Encountering AI in GBV-Related Work

224 Responses

Category	Responses
Administrative or documentation tasks (e.g., case notes, scheduling)	93
Survivor support (e.g., chatbots, online intake, translation tools)	80
Public education or awareness campaigns	60
I haven't seen AI used in the GBV context	58
Report or grant writing for GBV related projects	50
Research or evaluation	50
Prevention or risk assessment (e.g., predictive or screening tools)	39
Training or workforce development	38
Other (please specify):	19

Where Respondents See AI Being Applied

209 Responses

Application	Responses
Administrative efficiency	90
Survivor support and access	63
Creative and communications support	62
Research and evaluation	54
Prevention and prediction	51
Training and professional development	49
Public education and awareness	42
Not seeing clear benefits yet.	31
I do not see use or application of AI tools in the GBV sector.	30
Other (please specify):	15

What the Survey Data Tells Us

- AI-related risks are interconnected

- There is no single "right" or "safe" use

- Respondents reported that in their work, they are navigating tension, not seeking simple answers

Conclusion: What this Snapshot Offers

- Insight into how AI is showing up in GBV-related work and environments
  - Often cautiously and selectively
- Respondents emphasized that questions about AI in GBV-related work involve ongoing judgment and are shaped by GBV sector values, roles, and context.
